

Portable Digital Visual Presenter specially designed to be used with 14 x 17 inches films on which the MRI and CAT scans are commonly printed.

Alberto Angel Fernández Dell'Oca

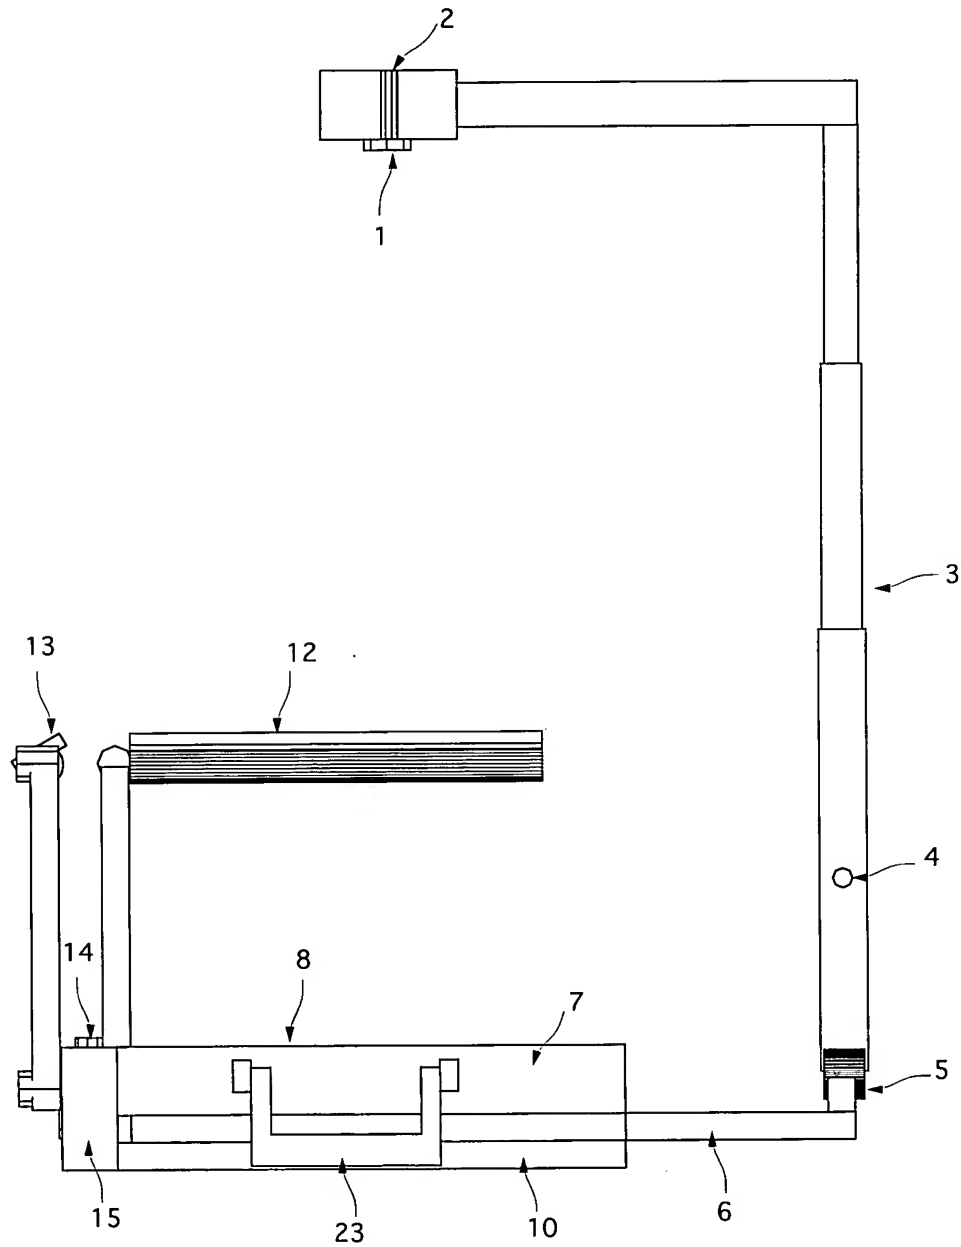

FIG. 1

Portable Digital Visual Presenter specially designed to be used with 14 x 17 inches films on which the MRI and CAT scans are commonly printed.

Alberto Angel Fernández Dell'Oca

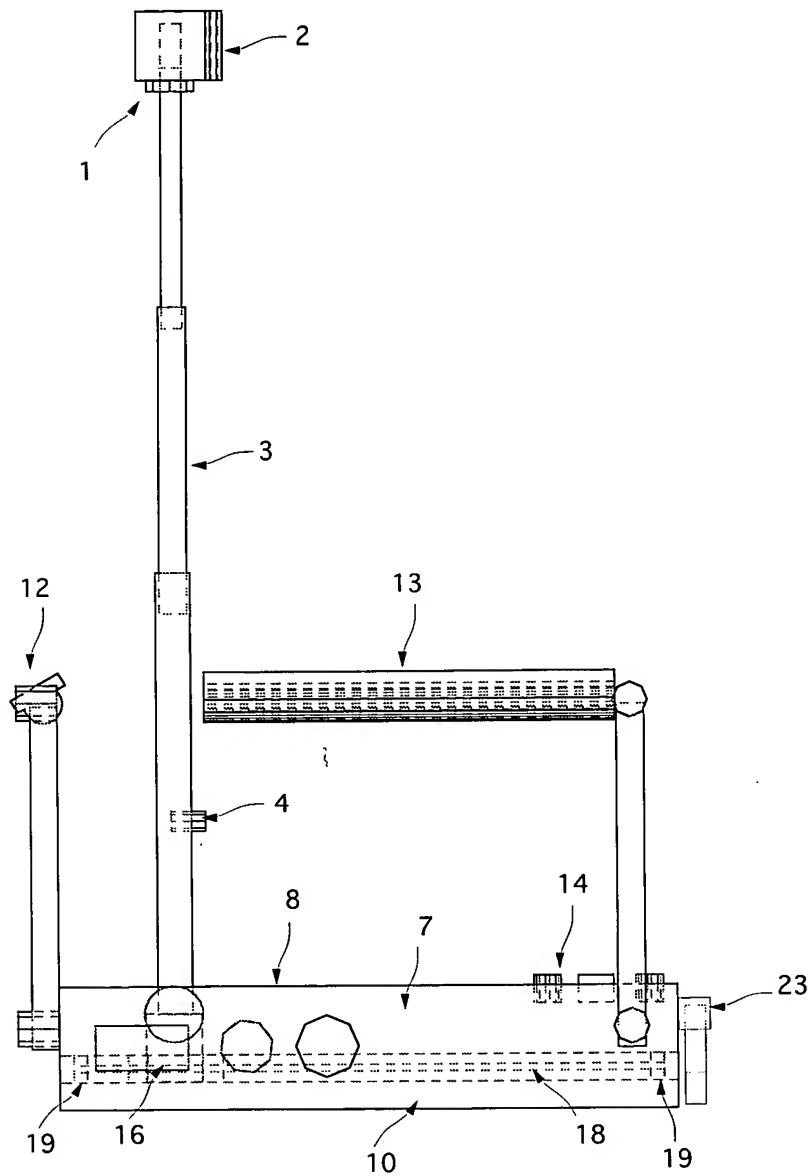

FIG. 2

Portable Digital Visual Presenter specially designed to be used with 14 x 17 inches films on which the MRI and CAT scans are commonly printed.

Alberto Angel Fernández Dell'Oca

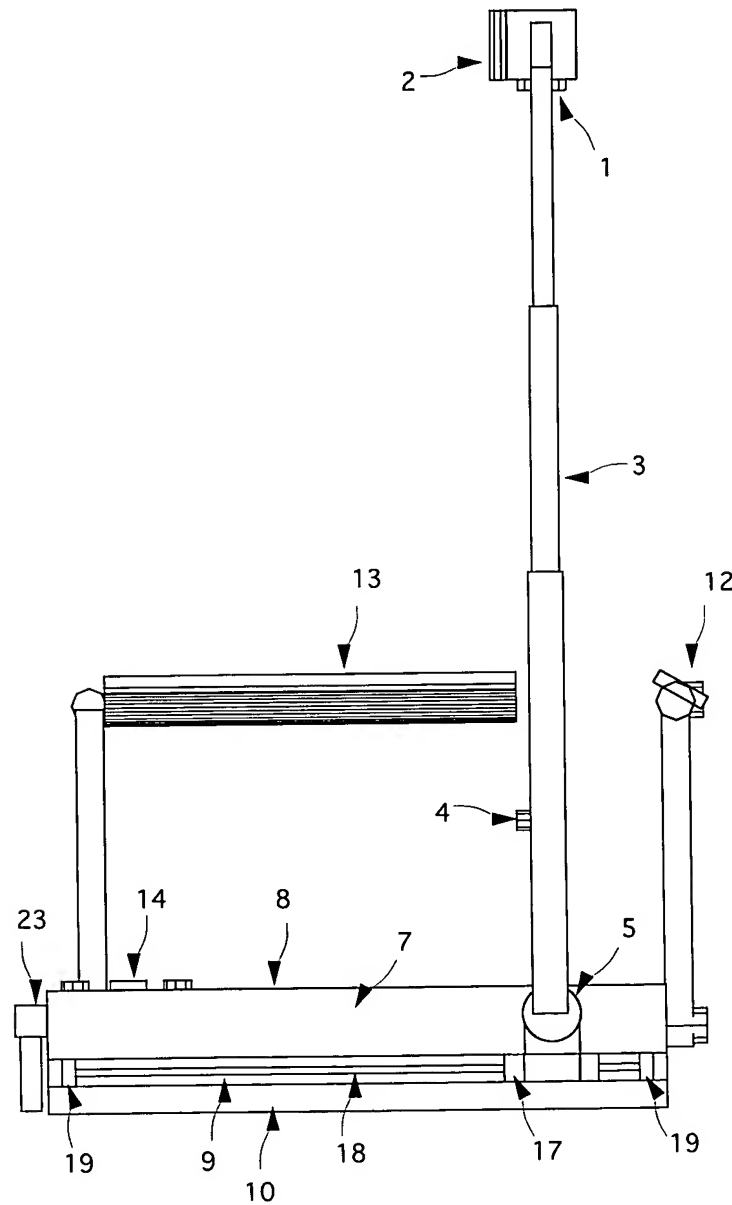

FIG. 3

Portable Digital Visual Presenter specially designed to be used with 14 x 17 inches films on which the MRI and CAT scans are commonly printed.

Alberto Angel Fernández Dell'Oca

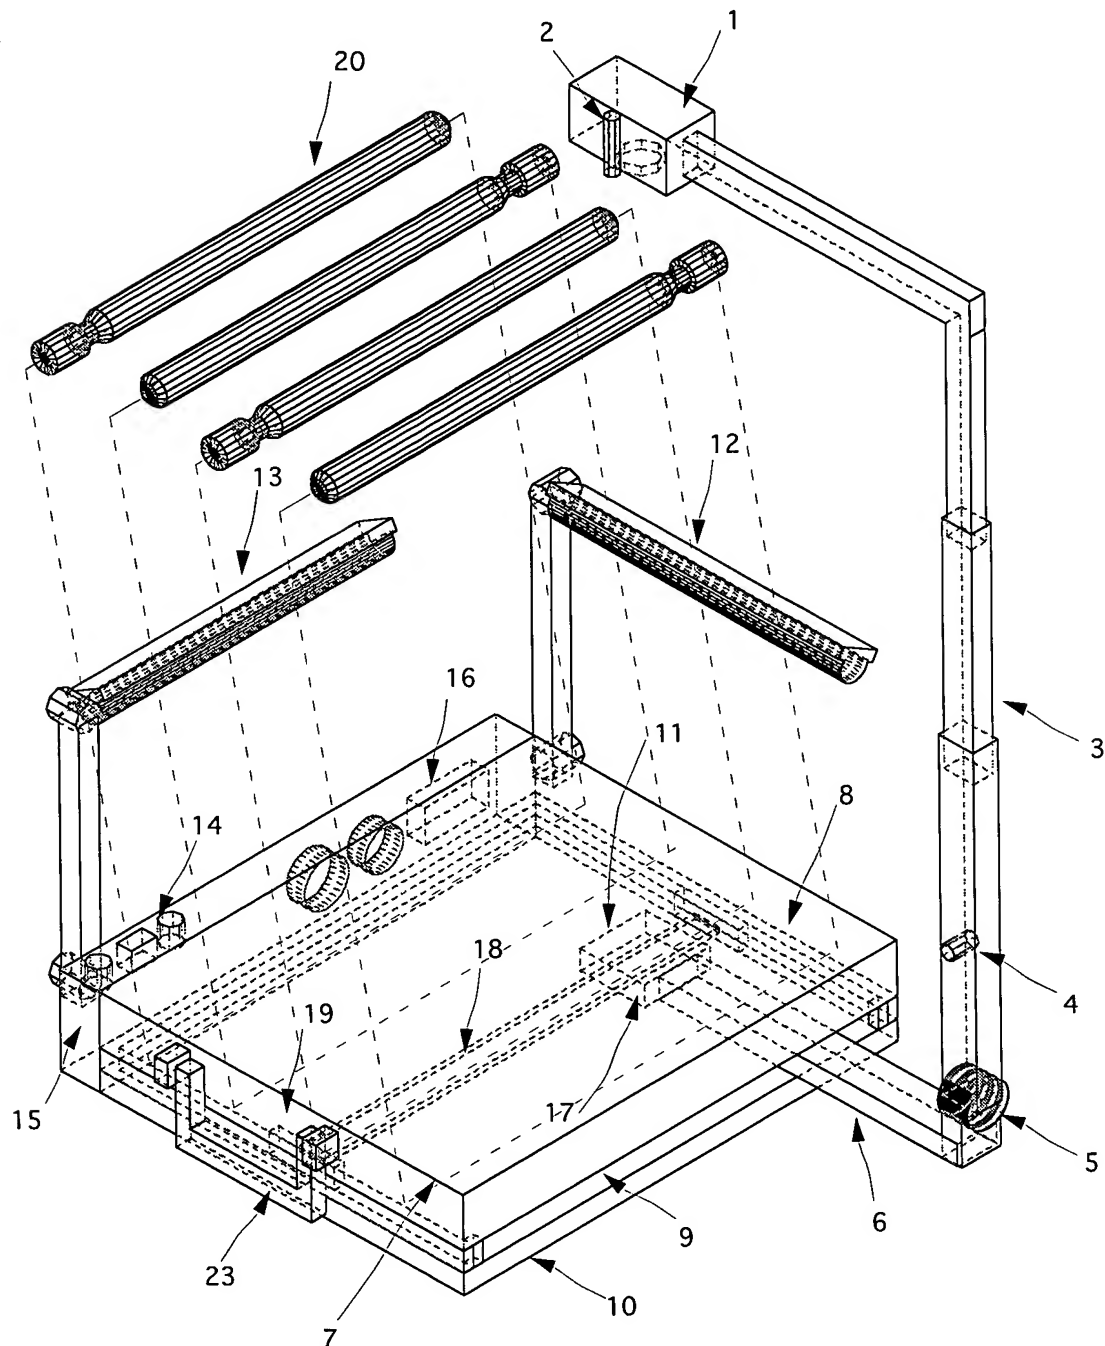

FIG. 4

Portable Digital Visual Presenter specially designed to be used with 14 x 17 inches films on which the MRI and CAT scans are commonly printed.

Alberto Angel Fernández Dell'Oca

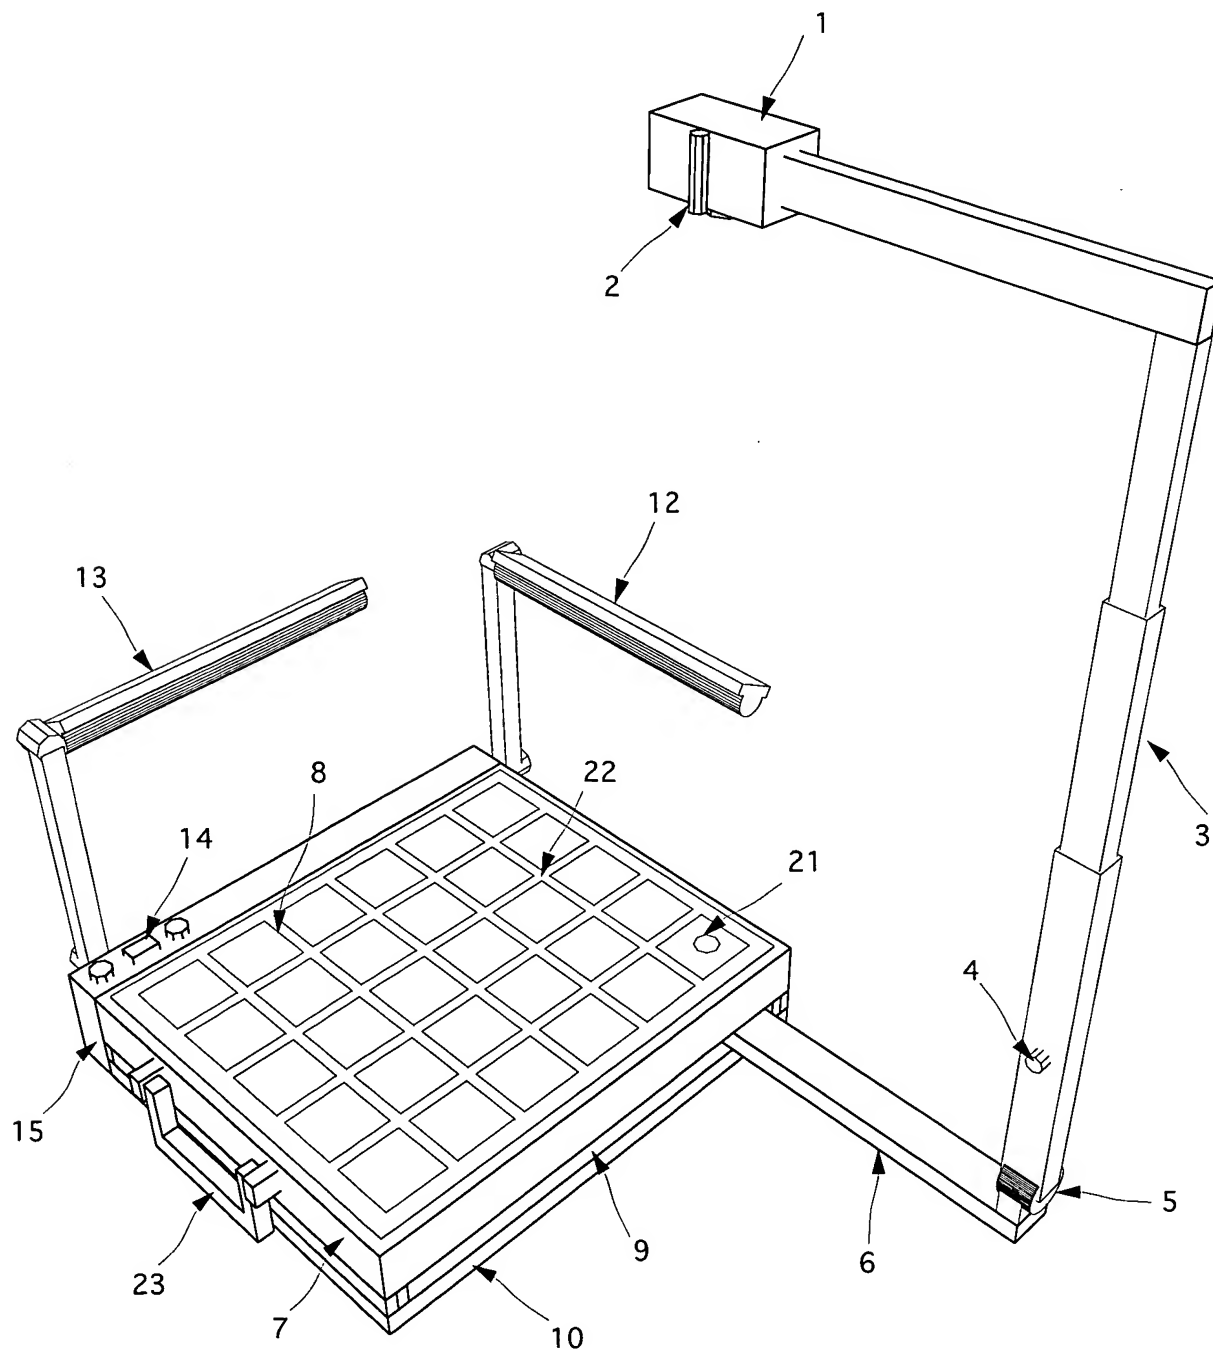

FIG. 5

Portable Digital Visual Presenter specially designed to be used with 14 x 17 inches films on which the MRI and CAT scans are commonly printed.

Alberto Angel Fernández Dell'Oca

FIG. 6A

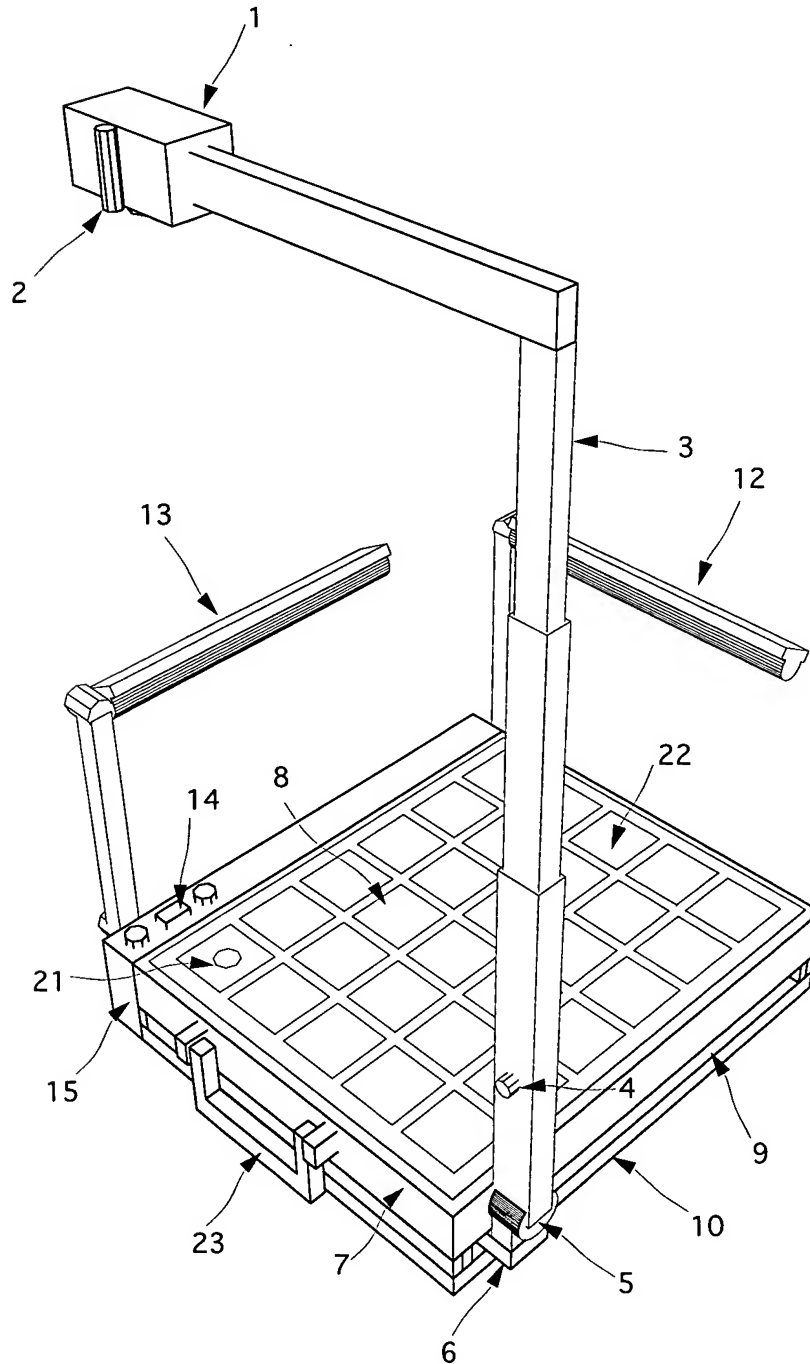

Alberto Angel Fernández Dell'Oca

Portable Digital Visual Presenter specially designed to be used with 14 x 17 inches films on which the MRI and CAT scans are commonly printed.

Alberto Angel Fernández Dell'Oca

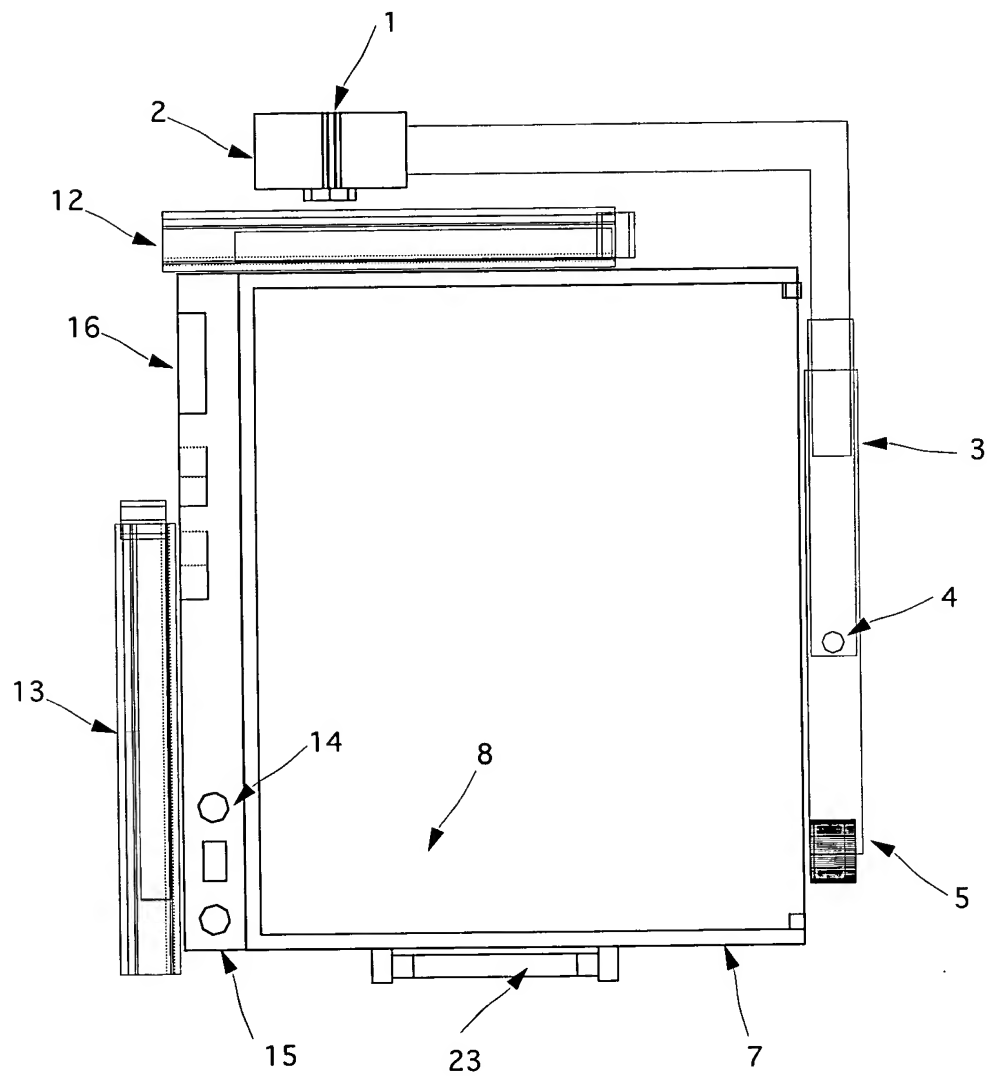

FIG. 6C

Portable Digital Visual Presenter specially designed to be used with 14 x 17 inches films on which the MRI and CAT scans are commonly printed.

Alberto Angel Fernández Dell'Oca

FIG. 7

Portable Digital Visual Presenter specially designed to be used with 14 x 17 inches films on which the MRI and CAT scans are commonly printed.

Alberto Angel Fernández Dell'Oca

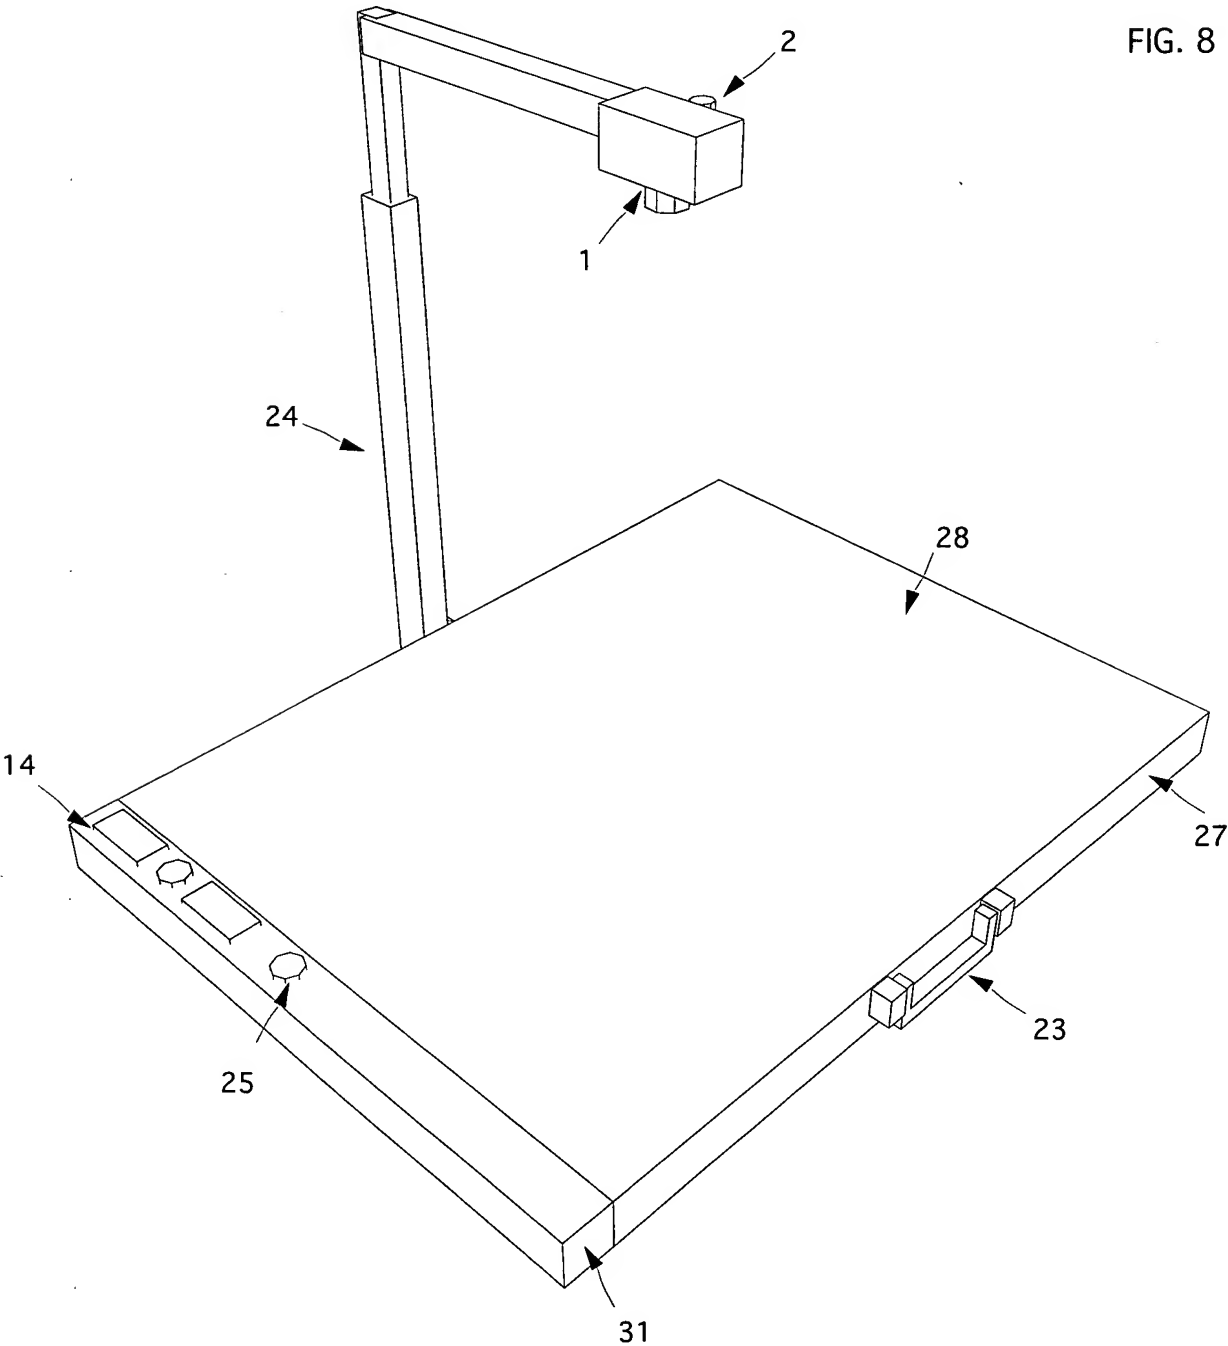

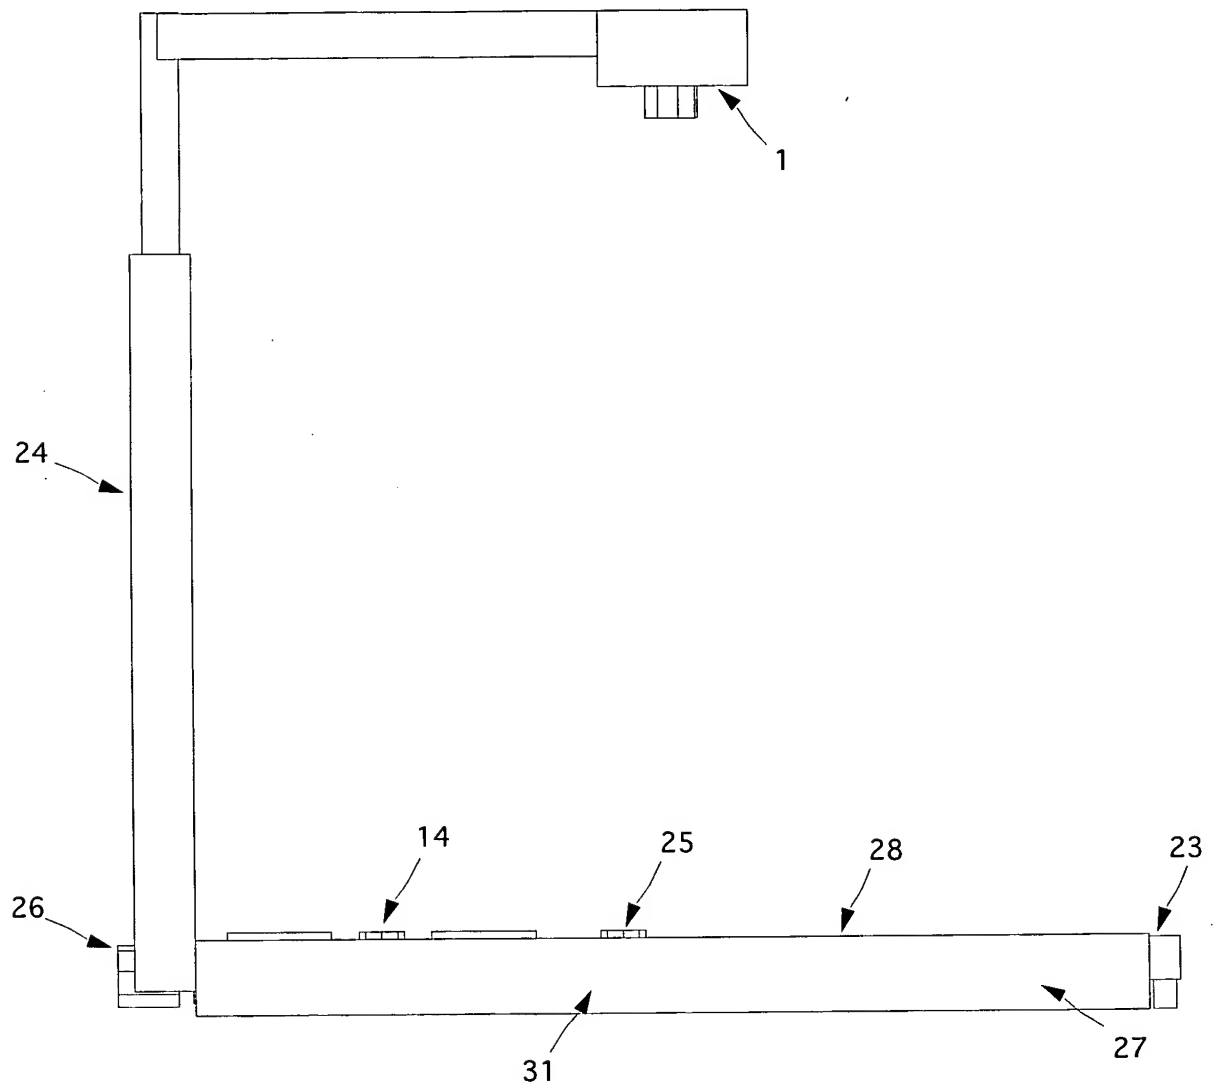

FIG. 8

Portable Digital Visual Presenter specially designed to be used with 14 x 17 inches films on which the MRI and CAT scans are commonly printed.

Alberto Angel Fernández Dell'Oca

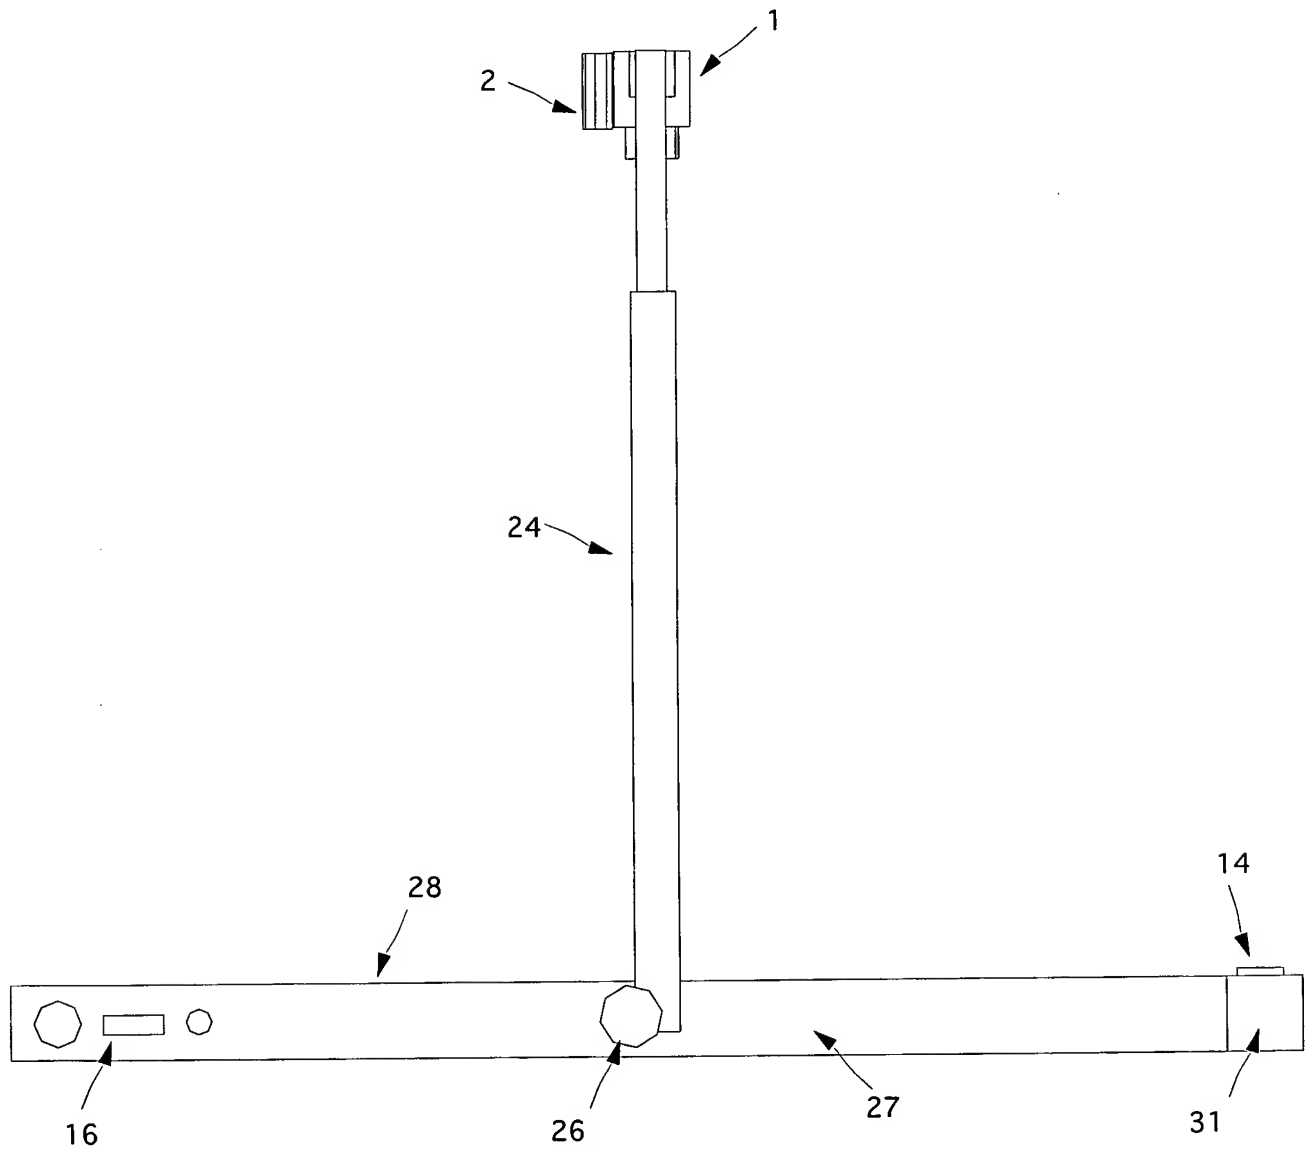

FIG. 9

Portable Digital Visual Presenter specially designed to be used with 14 x 17 inches films on which the MRI and CAT scans are commonly printed.

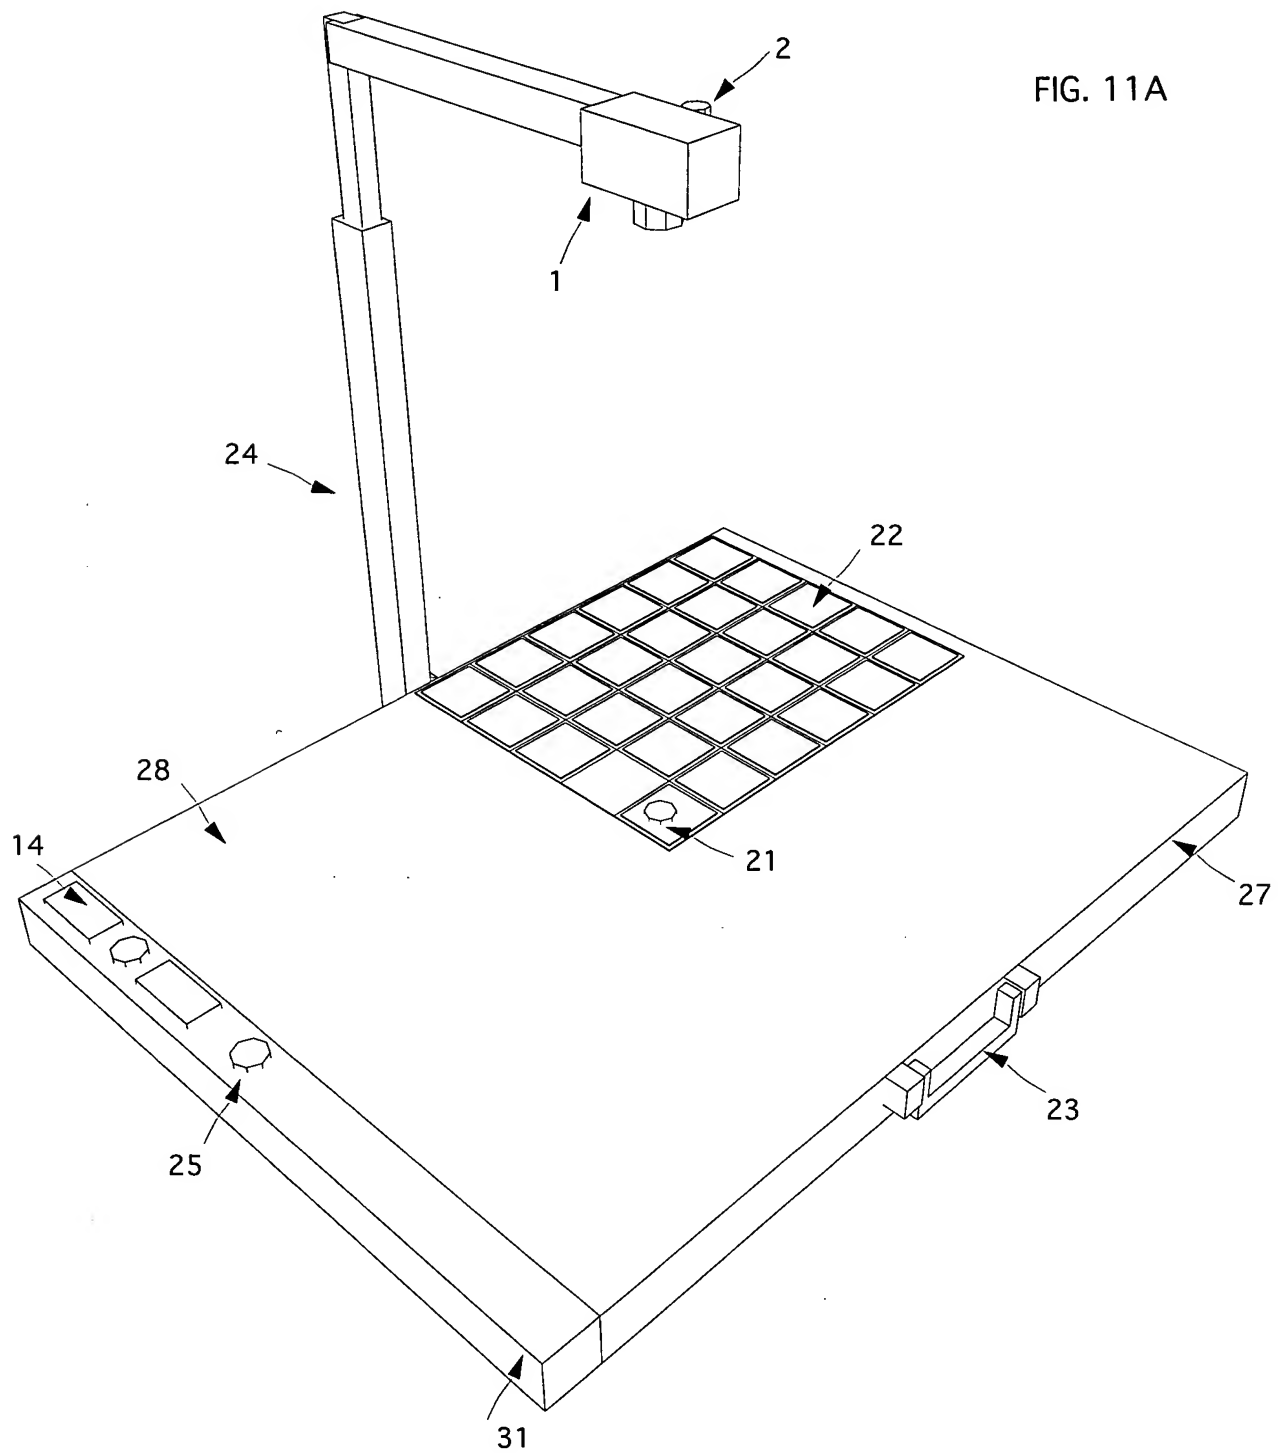

Alberto Angel Fernández Dell'Oca

FIG. 10

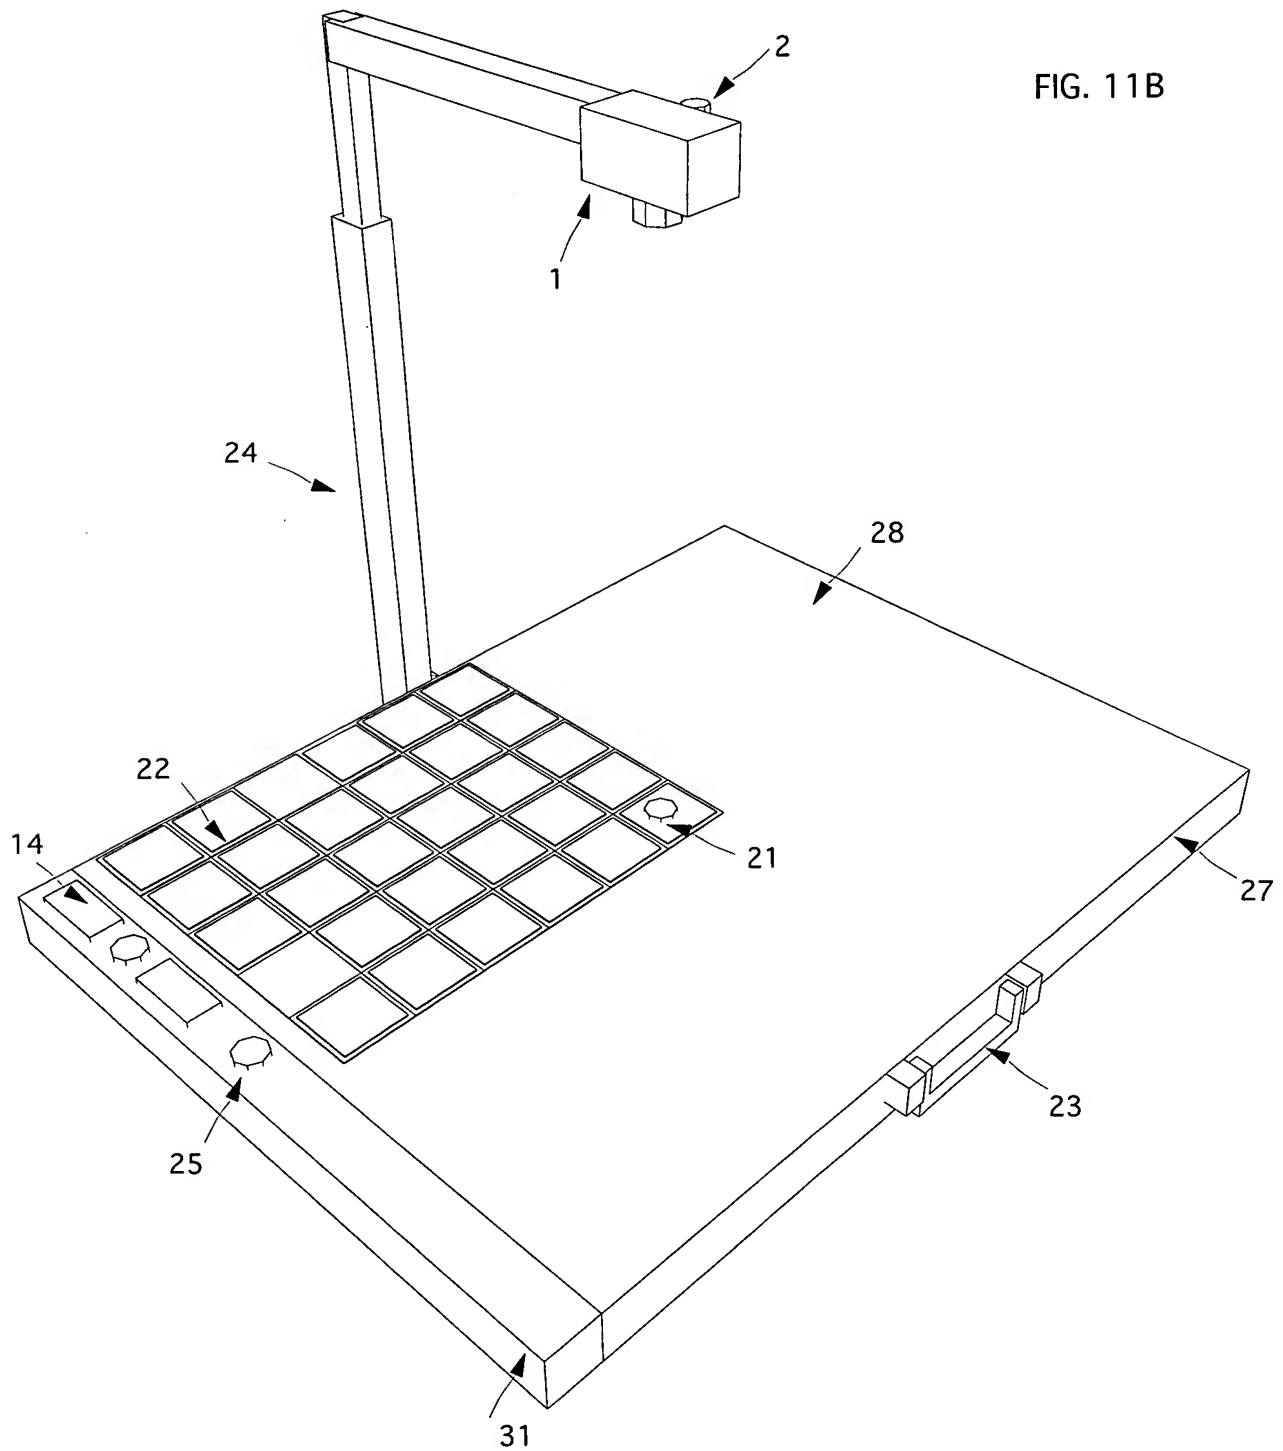

Portable Digital Visual Presenter specially designed to be used with 14 x 17 inches films on which the MRI and CAT scans are commonly printed.

Alberto Angel Fernández Dell'Oca

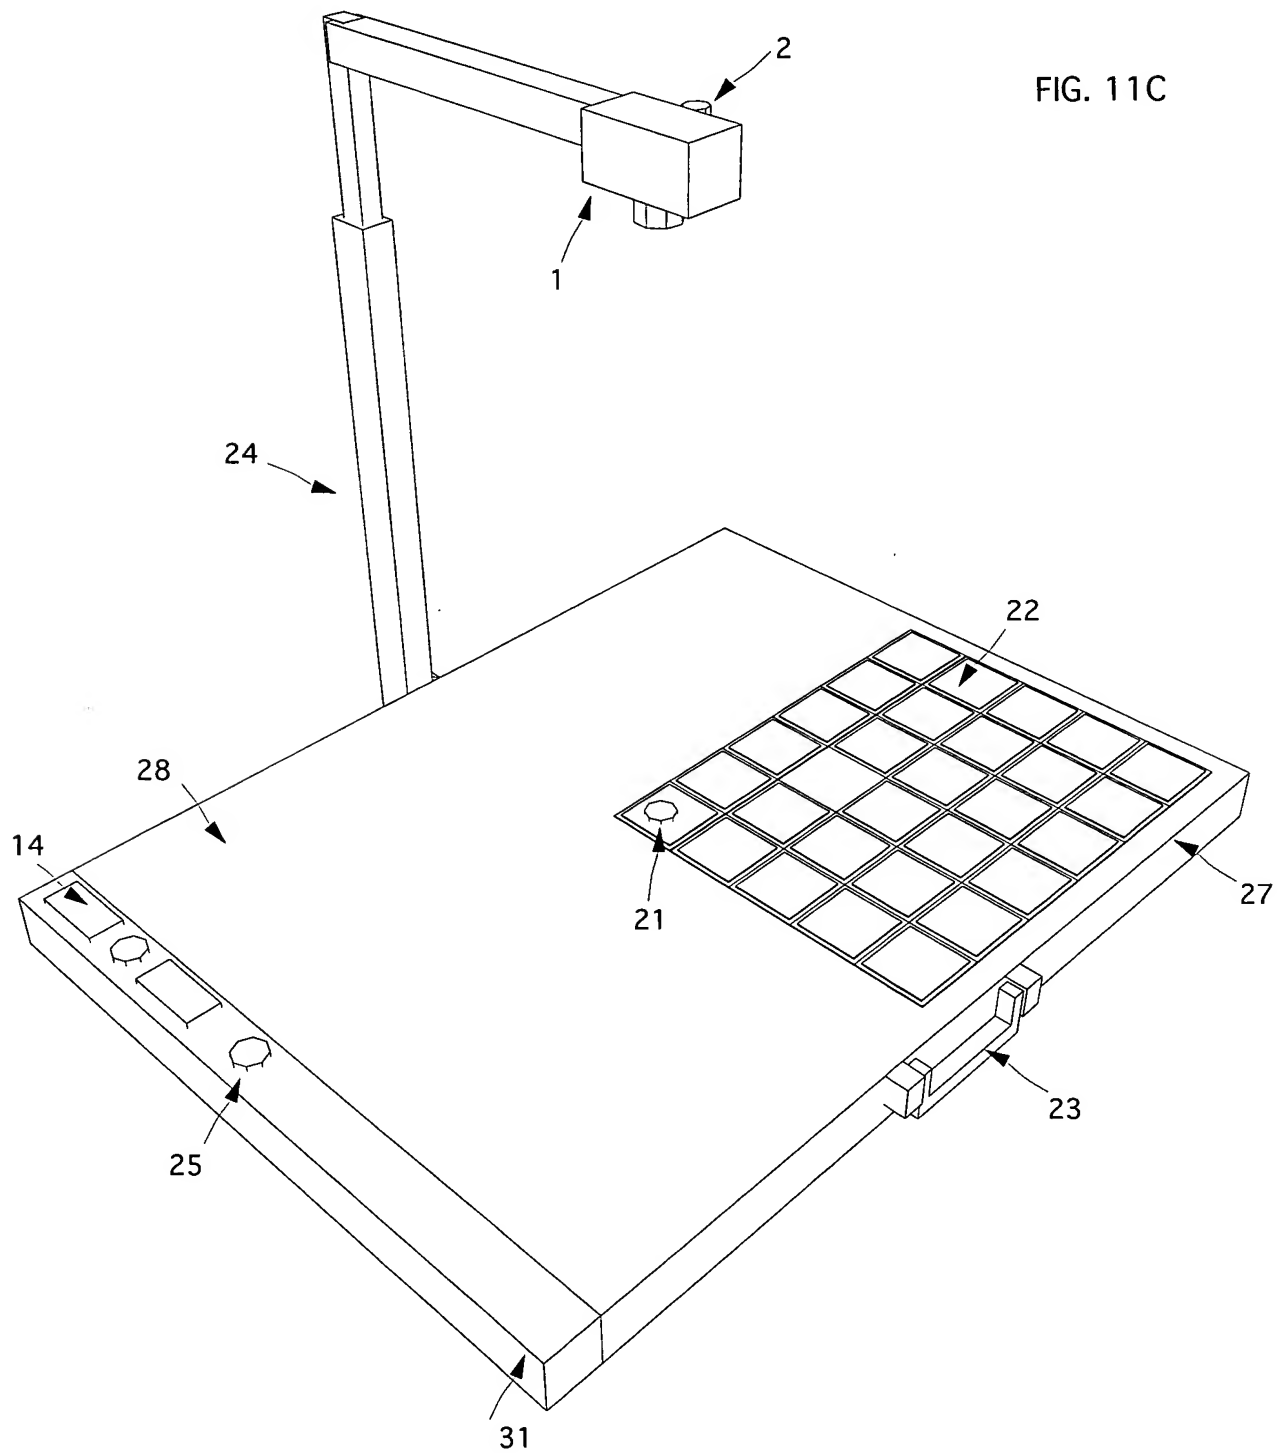

Portable Digital Visual Presenter specially designed to be used with 14 x 17 inches films on which the MRI and CAT scans are commonly printed.

Alberto Angel Fernández Dell'Oca

Portable Digital Visual Presenter specially designed to be used with 14 x 17 inches films on which the MRI and CAT scans are commonly printed.

Alberto Angel Fernández Dell'Oca

Portable Digital Visual Presenter specially designed to be used with 14 x 17 inches
films on which the MRI and CAT scans are commonly printed.
